

CARBIT™ SYSTEMS

TUNGSTEN CARBIDE MAINTENANCE GRADING

A long lasting, grader edge system designed for Council maintenance graders. Faster, safer and cost effective

Rotating Tungsten Carbide Tool Bits

Up to 90% savings over standard grader edges

Point load design enables the grader to easily cut the road surface to remove potholes and corrugations.

Rotating tungsten carbide bits provide excellent abrasion resistance while recycling gravel and remixing with fines.

System allows higher grading speeds for increased productivity.

Safe and easy maintenance.
